THROWDOWN SNAPS 100 pieces	ICE FOUNTAINS 3 pieces

Greetings!

For what seems like an age we have spent serious time searching and researching new products to run alongside our best-selling Indoor Fireworks selection pack.

Our continued aim is to offer products that are easily stored and sold all year. All our products have gone through extensive additional testing in order for us to classify them as a 1.4S hazard item. 1.4S fireworks can be sold all year round without a firework sales licence and can be stocked anywhere in the shop without the requirement to be in a protective cabinet.

We are delighted to have a new business partnership with Italian specialists Pyrogiochi who are masters in design and technology.

Further to this all our Ice Fountains are made with food grade plastic and have been extensively tested for this. This is very important – safety and quality is paramount. Our new range of ice fountains and sparklers are of the highest quality available.
